JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Ac impedance
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification 75
Activity coefficients
Applicability of the modified Pitzer equations to the fitting of activity coefficients in electrolyte-aminoacid aqueous mixtures: the case of NaCl + β-Alanine at 298.15 K 59
Ac voltammetry
Mathematical analyses of ac voltammetry of a surface confined redox process 33
Anionic clays
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides 91
Aromatic
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N*,*N*-dimethylformamide 123
Au(111)
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode 107

Bioelectrocatalysis
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9
Biomimetic membrane
Impedance measurements with phospholipid-coated mercury electrodes 155
2-Butanone
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions 161
3-Buten-2-one
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions 161

C60
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9
Catalytic hydrogen reduction
Inosine reduction study at low pH by a combination of electrochemical methods 65
Catalytic mechanism
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry 15
Chronoamperometry
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry 15
C_{60}-monolayer
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9
Cyclic voltammetry
Electrochemistry of zeolite-encapsulated complexes: new observations 83
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry 15

Differential pulse polarography
Inosine reduction study at low pH by a combination of electrochemical methods 65
Diffusion coefficients
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N*,*N*-dimethylformamide 123
DNA base
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode 107
Doped lead dioxide
Lead dioxide electrodeposition and its application: influence of fluoride and iron ions 203
Doping
Characterization of polymeric films derived from α- and β-substituted *N*-vinylpyrroles 99

Electroadsorption
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions 161
Electrocatalytic effect
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films 145
Electrochemical kinetics
State variable approach to electrochemical dynamics 39
Electrochemical mass spectrometry
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions 161
Electrochemical quartz crystal microbalance
A combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD) study of a poly(*o*-toluidine) modified electrode in perchloric acid solution 1
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions 183
Electrodeposition
Lead dioxide electrodeposition and its application: influence of fluoride and iron ions 203
Electrode reaction mechanism
Inosine reduction study at low pH by a combination of electrochemical methods 65

PII S0022-0728(98)000313-1

Electron mediator
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9
Electroreflectance spectroscopy
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification 75
Elimination polarography
Inosine reduction study at low pH by a combination of electrochemical methods 65
Encapsulation
Electrochemistry of zeolite-encapsulated complexes: new observations 83
EPR
SPES, ^6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials 173
Extinction coefficients
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N,N*-dimethylformamide 123

Ferrocene sulfonate
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides 91
Frequency dependence
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification 75
Fullerene
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9

Glucose oxidase
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9

Heteroaromatic
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N,N*-dimethylformamide 123
Hexacyanoferrate
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification 75
Hydrogen evolution reaction
Hydrogen evolution/oxidation reactions on porous electrodes 115
Hydrogen oxidation
Hydrogen evolution/oxidation reactions on porous electrodes 115
Hydrogen pressure
Hydrogen evolution/oxidation reactions on porous electrodes 115

Immittance
State variable approach to electrochemical dynamics 39
Impedance
Impedance measurements with phospholipid-coated mercury electrodes 155
State variable approach to electrochemical dynamics 39
Impedance response
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl) pyridinium]chloride films 145

Indigodisulfonate
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films 145
Inosine associates
Inosine reduction study at low pH by a combination of electrochemical methods 65
Inosine reduction
Inosine reduction study at low pH by a combination of electrochemical methods 65
Input/output phase relations
Mathematical analyses of ac voltammetry of a surface confined redox process 33
In-situ electrochemical atomic force microscopy (ECAFM)
An AFM study of the properties of passive films on iron surfaces 53
In-situ infrared spectroscopy
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode 107
Iron surfaces
An AFM study of the properties of passive films on iron surfaces 53

LDH modified electrodes
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides 91
$LiCoO_2$
SPES, ^6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials 173
Loaded ionomer
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films 145

MAS NMR
SPES, ^6Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials 173
Methylviologen
Frequency dependence of the electroreflectance signal for redox reaction of solution-phase species at the electrode surface: formulation and experimental verification 75
Microelectrodes
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry 15
Mixed systems
Applicability of the modified Pitzer equations to the fitting of activity coefficients in electrolyte-aminoacid aqueous mixtures: the case of NaCl + β-Alanine at 298.15 K 59
Modified electrode
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions 183
Electrochemistry of zeolite-encapsulated complexes: new observations 83
Multipotential step
General analytical solution for a catalytic mechanism in potential step techniques at hemispherical microelectrodes: Applications to chronoamperometry, cyclic staircase voltammetry and cyclic linear sweep voltammetry 15

Nickel hydroxide
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions 183
Nitroxide
Electrochemical study of ferrocene and nitroxide derivatives intercalated in Zn–Cr and Zn–Al layered double hydroxides 91
Nonlinear analysis
State variable approach to electrochemical dynamics 39

Oxygen and ozone evolution
Lead dioxide electrodeposition and its application: influence of fluoride and iron ions 203

Passive film
An AFM study of the properties of passive films on iron surfaces 53
Permeability
Characterization of polymeric films derived from α- and β-substituted *N*-vinylpyrroles 99
Phase transition
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode 107
Phospholipid-coated mercury electrodes
Impedance measurements with phospholipid-coated mercury electrodes 155
Platinum
A DEMS study of the electroreduction and oxidation of 3-buten-2-one and 2-butanone adsorbates on platinum in sulphuric solutions 161
Polymeric films
Characterization of polymeric films derived from α- and β-substituted *N*-vinylpyrroles 99
Poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride film
Enhanced rate of the redox reaction of indigodisulfonate at electrodes coated with poly[1-methyl-3-(pyrrol-1-ylmethyl)pyridinium]chloride films 145
Poly(*o*-toluidine)
A combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD) study of a poly(*o*-toluidine) modified electrode in perchloric acid solution 1
Pore utilization
Hydrogen evolution/oxidation reactions on porous electrodes 115
Porous electrodes
Hydrogen evolution/oxidation reactions on porous electrodes 115
Potentiostatic macroelectrolysis
Inosine reduction study at low pH by a combination of electrochemical methods 65
Probe beam deflection
A combined electrochemical quartz crystal microbalance (EQCM) and probe beam deflection (PBD) study of a poly(*o*-toluidine) modified electrode in perchloric acid solution 1
Pseudo-spinel phase
SPES, ^{6}Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials 173

Radical anions
New methods for the accurate determination of extinction and diffusion coefficients of aromatic and heteroaromatic radical anions in *N*,*N*-dimethylformamide 123
Recombination of radicals
Inosine reduction study at low pH by a combination of electrochemical methods 65
Redox enzymes
C_{60}-mediated bioelectrocatalyzed oxidation of glucose with glucose oxidase 9
Redox process
Mathematical analyses of ac voltammetry of a surface confined redox process 33
Redox switching
Effect of time scale on redox-driven ion and solvent transfers at nickel hydroxide films in aqueous lithium hydroxide solutions 183

Sniftirs
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode 107
SPES
SPES, ^{6}Li MAS NMR, and Ni^{3+} EPR evidence for the formation of Co^{2+}-containing spinel phases in $LiCoO_2$ cycled electrode materials 173
Stacking interaction
Inosine reduction study at low pH by a combination of electrochemical methods 65
State variables
State variable approach to electrochemical dynamics 39
Steady-state
State variable approach to electrochemical dynamics 39
System dynamics
State variable approach to electrochemical dynamics 39

Tafel curves
Hydrogen evolution/oxidation reactions on porous electrodes 115
The Pitzer equation
Applicability of the modified Pitzer equations to the fitting of activity coefficients in electrolyte-aminoacid aqueous mixtures: the case of NaCl + β-Alanine at 298.15 K 59
Thymine adlayers
In-situ infrared spectroscopic studies of thymine adsorption on a Au(111) electrode 107
Transition metal complex
Electrochemistry of zeolite-encapsulated complexes: new observations 83

Zeolite
Electrochemistry of zeolite-encapsulated complexes: new observations 83
